EXECUTIVE SUMMARY

Computer Science undergraduate with hands-on experience in full-stack development. Skilled in building responsive web applications, and device-friendly interfaces. Strong problem-solving abilities, consistent project execution, and a growing interest in system-level programming. Seeking internship or entry-level opportunities in software development or full-stack engineering.

TECHNICAL SKILLS

- **Programming:** C, C++, HTML, CSS, Python, JavaScript, TypeScript.
- **Web/Frameworks:** Next.js, React.js, Node.js, Express.js, Flask
- **Embedded Systems/IoT:** Arduino, RFID (MFRC522), Serial Communication
- **AI/ML:** YOLOv8, OpenCV, Object Tracking, LLM APIs (Groq)
- **Databases:** SQLite
- **Developer Tools:** NumPy, Matplotlib, Git/GitHub, Linux, VS Code.

EXPERIENCE

Aeroaspire - Tech startup | **Software Developent Trainee - View Certificate**

Sep 2025 – Oct 2025 | Bengaluru, India

Impact:

- Completed a 5-week structured training program covering full-stack fundamentals (React, Flask, SQLite, Docker)

HACKATHONS

Winner Second Place – 404: Limits Not Found

- Built in 24 hours straight at 404: "Limits Not Found" themed around "Build the Impossible" at BMSCE held on 27th and 28th March, 2026. - View Certificate

Winner Second Place – Capture the flag (CTF)

- Secured second place at Capture the flag at JSS Navotthana, a 24-hour National Level Offline Hackathon, held on 10th and 11th April, 2026. - View Certificate

PROJECTS

1. **RFID BASED VENDING MACHINE**

   Tech: Arduino Mega 2560, MFRC522 (RFID), Node.js, Express, SQLite, Arduino C++, I2C LCD

   Live: omni-vend.vercel.app | **GitHub:** github.com/Atpdevil/omni-vend

- Built an offline RFID-token vending system that validates tokens and dispenses items without any internet dependency, solving UPI failures in low-connectivity areas.
- Developed end-to-end modules for RFID authentication, motor-driven dispensing, keypad item selection, and a Node.js backend with SQLite for real-time balance tracking and recharge.

2. **SMART CCTV - (2nd place Hackathon Winner in BMS Held on27th and 28th March 2026)**

   Tech: Python, Flask, OpenCV, YOLOv8, ByteTrack, TorchReID, SQLite, Groq LLM, Vanilla JS

   Live: smartcctv-production.up.railway.app | **GitHub:** github.com/Atpdevil/smart_cctv

- Built an AI-powered multi-camera surveillance dashboard with real-time YOLOv8 object detection, ByteTrack tracking, and cross-camera re-identification using OSNet-AIN.
- Developed browser-drawn restricted zones with intrusion alerts, natural-language forensic search over recorded events, clip playback, and a one-click lockdown mode.

3. **EVRYCHARGE**

   Tech: Next.js, React, Node.js, Zustand, Google Maps API, CSS.

   Live: evrycharge.vercel.app | **GitHub:** github.com/Atpdevil/EVryCharge

- Built a dual-role EV charging platform enabling users to find chargers, book slots, and manage wallets, while hosts add stations and track earnings.
- Developed end-to-end modules for authentication, booking, maps, and wallet flows using Next.js and Zustand.

4. **GAMING MASTERS**

   Tech: JavaScript, React.js, HTML, CSS, Node.js.

   Live: gaming-masters.vercel.app | **GitHub:** github.com/Atpdevil/gaming-masters

- Created a collection of browser-based games optimized for mobile and desktop.
- Added real-time interactions and improved state handling for smoother gameplay.

EDUCATION

AMC Engineering College, Bengaluru, Karnataka
B.E. in Computer Science and Engineering | *2023 – 2027*

Krupanidhi PU College, Bengaluru, Karnataka
PCMB in Science | *2021 - 2023*
